Welcome

**Welcome**

# Introducing the 'Open Space' process

## Purpose of process

*to establish a productive space where the Home Office and Civil Society can have safe and productive conversations about the implications of the Law Enforcement Data Service*

### **If successful, the proposed process will contribute to:**

- effective civil society input into the transfer process of the PND and PNC;
- the development of a more robust Privacy Impact Assessment;
- the development of the code of practice; and
- the development of an ongoing process of collaboration between the Home Office, civil society organisations and organisations from other sectors.

# Introductions

# Baroness Williams

Countering Extremism Minister

Responsible for Home Office Data Strategy and Biometrics &  
Identity

Home Office

**Today**

# Issues covered so far

## Process

- Agreed ways of working
- Agreed scope of the process

## Content

- Code of Conduct
- Inspection Regime
- Data Quality and Ethics
- Evidence in LEDS

# Workshop 3: Core issues

## Purpose

- To provide an opportunity to:
  - input into the policy relating to **custody images**
  - shape the **governance of LEDS**
  - introduce and decide whether and how to input into the **Home Office Biometrics Programme**
  - provide feedback on the **audit capability of LEDS**

# Agenda

- Introductions
- Countering Extremism Minister, Baroness Williams
- Programme update
- 3 papers
  - Custody Images
  - Governance of LEDS
  - Home Office Biometrics Programme

## Working Lunch

- Demonstration of LEDS Audit Capability
- Questions, comments and issues arising
- Next steps

# Programme update

**Any questions or comments?**

# Custody Images Policy

# Custody Images Policy

- Custody Image Review was constrained by technology limitations
- Home Office Biometrics Strategy committed to 'more efficient review and, where appropriate, automatic deletion of custody images'
- Mastered vs Replicated challenges

Image credit: [https://www.flickr.com/photos/us\\_mission\\_canada/14250009691](https://www.flickr.com/photos/us_mission_canada/14250009691)

## Technical questions for clarification

# Custody Images Policy

- What would be needed for participants to work with the Home Office to develop the policy on custody images?

Image credit: <https://www.pexels.com/photo/white-ceramic-cup-and-teapot-with-cupcakes-913137/>

# Governance of LEDS

# Governance of LEDS

- UK Public Sector Governance
- Civil society representation when LEDS is operational
- Accountability
- Digital governance
- Processes
- Governance groups and holding to account
- The Service Owner
- The inspection body

Image credit: [https://www.flickr.com/photos/us\\_mission\\_canada/14250009691](https://www.flickr.com/photos/us_mission_canada/14250009691)

## Questions for clarification

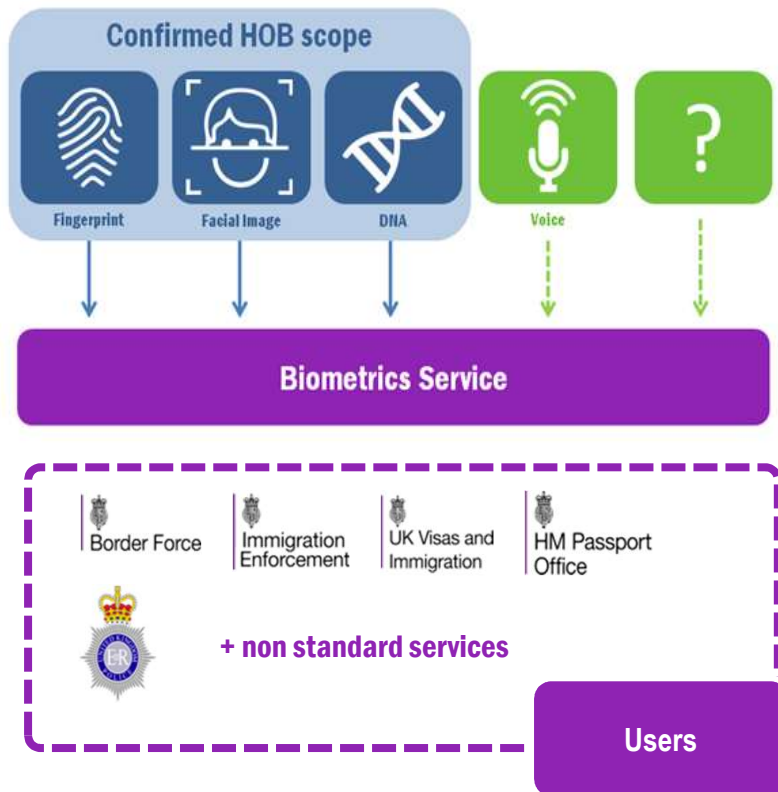

# Governance of LEDS

Three stations:

- Will the Nolan principles ensure transparency and openness in the way LEDS is operated and the data used? Including:
  - Structure - How is civil society represented?
  - Governance - What are the civil society requirements? How is civil society involved?
  - People & Culture - How is trust established and managed?
  - Infrastructure - How is information provided, how does civil society interact?
- Will the options for civil society representation and engagement create a culture of openness for those operating, using and having a stake in the use of LEDS, providing accountability, management and communication to mitigate the risks? What are the issues around the options and what else should be considered?
- Will the governance provide the perceived checks and balances needed?

- Significantly improved accuracy and public outcomes
- Bringing data collections and workflows together
- Logically separating the data collections with role-based access controls
- Developing strong governance around the management of data
- Providing a common biometric service for cross-government stakeholders

# Public Trust in HOB

## Continuity

- Current HOB focus is on the continuity of capabilities for operational and front line staff to access biometric data

## Privacy / Ethical assessment

- HOB is assessing the privacy and ethical impacts for all strategic projects through PIA/DPIA and the HOB Ethics Working Group

## Operational due diligence

- Due diligence of the touch points between the technology and front line operations to identify potential gaps in guidance, policy, etc and mitigations to close them

## Future enhancements...

- Future enhancements to biometric capabilities are still to be finalised

# Overall NLEDP Open Space Process

- **4 workshops:** July, October, November & February 2019
- **Outputs:** Write up of each workshop produced & shared with all participants
- **Content of future workshops:** Next workshop designed from the conclusions of the previous workshop
- **Interim Workshops:** Some interim workshops in between the 4 core workshops on specific topics
- **Participants:** Additional recommended organisations involved from September workshop onwards
- **Mid-2019:** Next version of the DPIA publication deadline
- **2020:** Deadline for merging of PND & PNC
