FOR FORM FOR ACQUISITION

Introduction

**Forms for acquisition** are designed to ensure that the Service’s bulk data acquisitions are necessary and proportionate. In legal terms, bulk data acquisitions are defined as:

Datasets acquired under Section 2 (2)(a) of the Security Service Act 1989 or Sections 2(2)(a) or 4(2)(a) of the Intelligence Services Act 1994 which contain data about a wide range of individuals, including [non-adverse] data about individuals who are not of direct intelligence interest.

So, **forms** are required where a bulk dataset...

- is likely to include large amounts of superfluous or non-targeted data
- includes data about individuals of no intelligence interest that may be of a personal or sensitive nature
- has not been acquired under an existing oversight mechanism e.g. RIPA
- has been generated by any external organisation or partner agency and exhibits the above characteristics

**Forms are not required** where the bulk dataset...

- relates to a targeted individual or has been acquired under an existing oversight mechanism e.g. RIPA
- is considered open source and is therefore already in the public domain
- has been procured commercially
- has been generated from within the Security Service

**Instructions for completing this form:**

The following process is intended to ensure the correct authorisations are in place prior to acquiring bulk data.

1. The Data Sponsor completes Section 1: Business Justification and electronically initials the form in the electronic system.
2. The Data Sponsor’s senior MI5 official approves Section 1 and electronically initials the form in the electronic system.
3. The Data Sponsor emails the relevant form to the following stakeholders: relevant teams and legal advisors.
4. The relevant team completes Section 2: Information Assurance and gives approval to proceed by electronically initialing the form in the electronic system.
5. The relevant team completes Section 3: Technical Feasibility and electronically initials the form in the electronic system.
6. The relevant team completes Section 4: Acquisition and electronically initials the form in the electronic system.
7. A senior MI5 official provides final approval for the acquisition to proceed and electronically authorises the form in the electronic system.
8. The relevant team signs off the form in the electronic system on completion of the bulk data acquisition, forwarding form to senior MI5 officials for future reference.
